

AlpFUTUR - on the future of summer pastures in Switzerland

Felix Herzog¹, Rosa Böni², Stefan Lauber², **Manuel Schneider¹**, Irmi Seidl²

¹ Agroscope Reckenholz-Tänikon Research Station ART, CH-8046 Zurich

² Research Station for Forest, Snow and Landscape WSL, CH-8903 Birmensdorf

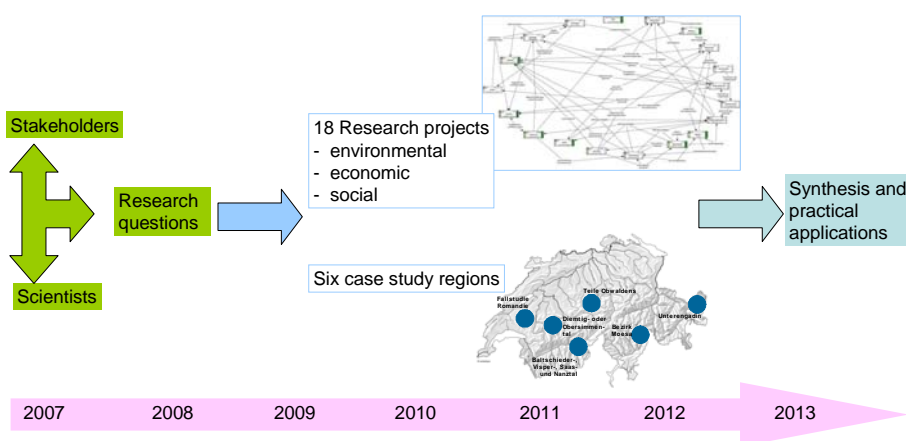

AlpFUTUR investigates

- the role of summer pasturing, herding systems and management intensity in preserving landscapes, biodiversity and productivity;
- effects of climate change on pasturing, biodiversity and natural hazards;
- the profitability of summer pasturing, (novel) products and innovations;
- the effectiveness of policies and the importance of the regional economy;
- the demands of society and requirements of the local population including herders.

Poster 17 - Session n°1
